### Polyester Double Braid

- **Melting point**  
260°C
- **Specific gravity**  
1.40 (sinks)
- **Elongation at break**  
12%
- **UV resistance**  
very high
- **Water absorption**  
very low
- **Abrasion resistance**  
very high

### POLYESTER DOUBLE BRAID White with Coloured Fleck

Polyester double braid is manufactured with a plaited polyester jacket over a plaited polyester core. Like all polyester cords, double braid is low stretch (about 12%), hard wearing and has a high UV resistance. Double braid is stocked in white (10); blue fleck (12); red fleck (13); green fleck (14); black fleck (15) and yellow fleck (16). This rope is ideal for running rigging on yachts and is popular for horse leads and halters. Manufactured in Australia from premium quality yarns. Longer lengths can be manufactured if required.

Please insert colour code from description to replace \*\* for the particular colour you wish to order.

### POLYESTER DOUBLE BRAID Colours

As above but in colours. Breaking strains are slightly lower using coloured yarn. Solid colours are stocked in blue (20); red (30); green (40) and black (50) in all sizes. Some sizes are also available in purple (90) and yellow (60). 16mm is only available in black.

**Marine Braids**

**SPECTRA DOUBLE BRAID**

Spectra double braid is manufactured with a polyester jacket over a plaited spectra core. It offers a very strong rope with maximum stretch of about 5%, which is less than half the stretch of standard polyester double braid. Spectra braid is also 7% lighter than standard polyester double braid. Spectra is stocked in blue (25); red (35); green (45) and black (50) in all sizes. Some sizes are also available in purple (95) and yellow (65). All ropes have a black fleck.
